

# Environmental Policy

*Version B – 16<sup>th</sup> March 2020*

It is the policy of Alchemy Automation Group Ltd to ensure that our impact on the environment and our neighbours is kept to a minimum and to promote greater environmental responsibility and awareness to all its employees in line with our business objectives based on the following precepts:

- Our legal requirements are clearly established and defined
- Ensuring that all products produced by us are pursuant to appropriate technical, safety and environmental standards
- All processes employed by Alchemy Automation Group Ltd are suitably resourced, clearly documented, monitored and measured to ensure conformance to:
  - Applicable industry regulations and legislation
  - Business objectives
- Effective mechanisms are in place to achieve our commitment to continual improvement

This will be achieved by:

- Establishing, implementing and maintaining a management system certified to ISO14001
- Setting measurable objectives and measuring these objectives to identify where improvements are required
- Ensuring that recycling and energy conservation form an integral part of our business operation
- Top management involvement in reviewing the effectiveness of the management system and regular review of risks and opportunities to make the required changes to meet our strategic goals

Nick Holman, Director
